1 Introduction

The documentation includes the process how you can deinstall the proconarum AddOn from your SAP ERP system, when you install it as a software component.

Important	<p>When you deinstall proconarum you will lose data, which are stored in proconarum tables. Especially the content of inquiries, questionnaires and request will be deleted.</p> <p>In chapter 3 Store data you will find the proconarum specific content tables.</p>
	See also note 1883223

2 Process of Uninstalling

2.1 Uninstall of the software component CNMA proconarum

To uninstall the software component CNMA proconarum call the following steps

- Start transaction SAINT in client 000
- Select the tab Uninstallable components
- Select CNMA Add-On
- Start uninstallation process

2.2 Manuel steps

To remove all settings of proconarum, please check the manual steps of the configuration guide of proconarum.

You must undo the manual settings in SAP standard SAP customizing tables, of you want to remove all settings, which are necessary to run proconarum.

3 Store data

In the following tables content data is stored. Be aware, when you uninstall the component the data is lost, which is stored in the tables:
