Advantages of Business Partner:

Reduced Data Maintenance

Acts as a central bracket for customer and supplier master data, allowing for centralized and streamlined data maintenance.

Efficiency and Error Reduction

Basic data, such as name and address, is recorded only once, reducing effort and minimizing errors.

Organizational Mapping

Enables the mapping of organizational structures, facilitating efficient evaluations of connections, sales, and business developments.

Data Cleanup Opportunity

Switching to Business Partner provides a one-time opportunity to clean up and correct old data from customer and supplier bases.

Procurement with proconarum

Handling "Old" Transactions

Existing in-house developments, forms, etc., can still access old customer and supplier bases through Customer-Vendor Integration (CVI).

All transactions related to customer and supplier bases now refer to the central Business Partner transaction.
