Our Solution

Bring CSR targets into your supply chain

pro **sustain** is a cloud solution built on SAP Business Technology Platform. prosustain connects your spend data with supplier sustainability performances - giving you a holistic view of procurement's sustainability efforts in the global supply base.

Real-time status and flexible assessment design allows you to optimize your supplier sustainability analytics to the fullest.

Show stakeholders the contribution your procurement team has made to the company's sustainability targets and program, and reduce manual efforts, for example, when creating the annual corporate sustainability reports (e.g. german BAFA LkSG report)

How it works

Centralize supplier sustainability ratings into one place

Activity Management

Incident Management

Risk Score Management

Audit Score Management

Explore The Product

- **Keep track of CSR development** over time and use filters to deep-dive into different score types.
- **Pinpoint low-rated suppliers** that need to be improved before they become high-risk to your supply chain.
- **Conduct countermeasure activities** to remediate high-risk suppliers.
- **Reduce manual effort in sustainability reporting** - share insights easily within the organization and public, and free up time for value-adding tasks.

— Pricing

Get Started With The Right Plan!

Client's Cloud Deployment On SAP BTP

- Deploy proconarum onto client's cloud platform
- Client pays for SAP server and BTP subscriptions directly to SAP
- One-time payment: implementation fee, copyright fee, annual maintenance
- Additional fees for change requests

PaaS - Product as a Service

- Connect client's backend system to proconarum cloud
- Monthly rental fee based on chosen package
- Fee includes maintenance and change requests for features/bug fixing
